

Assesment Assignment Unit F
(5 points)

Background

In the last lecture we introduced the idea of robot teams, and the complications that cooperation and coordination bring to designing robot control behaviors. Take a moment and think about the extra complexities that will be involved in creating teams composed of both robots and humans.

Assignment

You are to read the article [The First Segway Soccer Experience: Towards Peer to Peer Human Robot Teams](#) (available on the course website) and then write a report summarizing the article.

Take care that your report answers the following questions:

- What were the principle challenges in working with human beings?
- How did the robot-centric approach differ from the human-centric approach?
- What were their final recommendations in regards to improving human-robot team interaction?

Your report should contain

- One page summary of an article, make sure to answer the questions above..
- Your name, course name, data, assignment number.
- NO HANDWRITING!

Related Video (it breaks my heart when he says “touchdown” but means “goal”)
