Download Java. Scroll down and select your OS and then select the installer for your OS/architecture. For example, on Windows, select the link for the **x64 Installer**. For Mac, select either the x64 or Arm 64, depending on the CPU your system uses. Linux uses different package types, select either the x64 or Arm 64, depending on the CPU your system uses, and there is a sub-category for the package type your OS uses (such as Debian for Ubuntu, or RPM for Fedora).

The JDK includes tools for developing and testing programs written in the Java programming language and running on the Java platform.
