Assignment 10: Powerpoint Presentation

due May 4, 2009

Do Exercise 2, on page PPT-79. Use the material in the outline in Figure 1-105 to create a Powerpoint presentation. There should be 4 slides plus a closing slide with just the title and YOUR name.

Apply a theme appropriate to the subject matter.

Make sure that the title (The Industrial Revolution) fits on one line on the first slide. The rest of the information should be in the subtitle box.

Make sure that your font color is readable against the background.

Do **not** change the name of the author or the course number on the first slide to your name! But DO put your name on the last slide, as discussed above.

On each of the 3 content slides, create bulleted lists. Use the levels indicated by the indents in the outline.

Spell-check your presentation and correct all errors!

Set the color scheme to grayscale and print it to hand in. Submit the color version by email.
