

Homework #0: Due January 29

Please submit an email to me answering the following questions:

1. Your full legal name (the name that appears on your BC official business)
2. The first name that you would like me to call you (even if this is the same as your legal name)
3. Your major (write undecided if you haven't declared yet)
4. Did you take CISC 1110 or 1115 and pass it with a grade of C or higher? (This is the prerequisite class. If your answering "no," you can't take this class.)
5. Did you take MATH 1011 (Precalc) and pass it with a grade of C or higher? (This is the prerequisite class. If your answering "no," you can't take this class.)
6. What is the highest programming class that you've ever taken? What programming language was this in?
7. What you would hope to learn in this class / what you hope to get out of this class. ("I'm taking this because it's part of my degree program" is a legitimate answer, but if you can give me a more detailed response, even better.)
8. Any questions/ comments/ concerns that you have.

Please email your responses to mermelstein.homework@gmail.com

Please put the subject as CISC 2110 -- <Your name>
