

Name: _____

CSC 101 - Quiz 2

For the following problems, you will work on the lab's computer. When you are finished, you'll write your code in pen in the space provided under each question. You are allowed to use the Internet but **only** to check HTML/JavaScript syntax.

Problem 1

(10 points)

Create a webpage named `remainder.html` that contains two boxes and a button. When the button is clicked, your Javascript statements should:

- (a) Access the numbers entered in the text boxes
- (b) Calculate the remainder after dividing the number in the first box with the number in the second box $\left(\frac{box1}{box2}\right)$
- (c) Display that remainder in the page.
