CIS 15 Spring 2010 Lab V.2

1. Polymorphism (part 2).

   - Take Lab V.1 and, making the print function in `person` virtual, make the code you wrote before print out the correct information when you call `whoIsIt`

2. Abstract class

   - Make the print function in `person` pure virtual.
   - How does that change the behavior of your code?
