

Table of Contents

Optimal bidding strategies for simultaneous Vickrey auctions with perfect substitutes
E. H. Gerding, R. K. Dash, D. C. K. Yuen and N. R. Jennings

An algorithmic approach to specifying and verifying subgame perfect equilibria
F. Guerin

Empirical game-theoretic analysis of Chaturanga
C. Kiekintveld, M. P. Wellman and S. Singh

A fast analytical algorithm for MDPs with continuous state spaces
J. Marecki, Z. Topol and M. Tambe

Universal agents in repeated matrix games
J. Poland and M. Hutter

Interactive dynamic influence diagrams
K. Polich and P. Gmytrasiewicz

Distribution of strategies in a spatial multi-agent game
F. Schweitzer and R. Mach

A prune-based algorithm for computing optimal coalition structures in linear production domains
C. Sombattheera and A. Ghose

Advances in hypergame theory
R. R. Vane

Empirical game-theoretic analysis of the TAC market games
M. P. Wellman, P. R. Jordan, C. Kiekintveld, J. Miller and D. M. Reeves

Goal oriented extensive games
V. A. Ziparo
