Overview

This is the last assignment for CISC 3650. This assignment involves reporting on the results of the user survey you did as part of your game assignment (for unit II). The assignment is worth 5 points (5% of term grade). **DUE: MAY 16 by 11:59pm. NO EXTENSIONS!! NO LATE SUBMISSIONS ACCEPTED!**

Instructions

1. *(1 point)* ENTER all the data that you collected from your surveys into a spreadsheet.
   The spreadsheet should contain a column for each question in your survey and rows for all the answers entered by each person. A sample is shown below, with data from 4 users:

survey #	question 1	question 2
1	excellent	3
2	fair	5
3	very good	5
4	very good	3

   Key:
   question 1 =   *how would you rate your game play experience?*
   question 2 =   *how many times did you play?*

2. TALLY the data.
   For each question, add up the number of users who answered similarly.

   For example, in my sample above, the tally for question 1 is:

answer	number of responses
excellent	1
very good	2
good	0
fair	1
poor	0

3. *(2 points)* PRESENT the data.
   WRITE a SHORT REPORT that lists each question from your survey and shows the tallied answers in both tabular form (as above) and in a graph, such as a bar graph or pie chart.

4. *(2 points)* DRAW CONCLUSIONS by analyzing the data.
   WRITE some text at the end of your report that summarizes the results. For example, "Most users did not like the game", or "Users who played more than 5 games liked it, but users who played only 1 game did not like it."

Submission

- Your assignment should consist of two files: a SPREADSHEET (ODS, XLS or XLSX format) and a WRITTEN REPORT (PDF, ODT, DOC or DOCX format).
  Please ZIP these together into a single archive and submit the one archive file.
- Submit your assignment electronically, using the submission page linked on the class web page.
